Share your notes, presentations, documents, images, and drawings with anyone, anywhere in the world!

### eBeam® Server

The eBeam Server Software is an optional software component for eBeam System users who need to share interactive whiteboard notes and drawings with large audiences. While each eBeam System comes with the ability of sharing notes with up to 10 users on the local network and up to 25 users on the Internet, the eBeam Server Software provides customers with an affordable large-scale and highly secure in-house web conferencing solution.

### Technical Support

Six month technical support (email) included.

### Warranty

Two year limited warranty on hardware and software.
