Product Guide

GN Netcom™

The best products in the hands-free business.

GN Netcom has always been the innovator in the headset industry. We invented the multipurpose amplifier, and were the first to put a noise-canceling microphone on a headset. In just the last few years, our list of “firsts” has grown dramatically: the first headset with a built-in amplifier, the first 2.4 GHz wireless headset and the first professional-quality Bluetooth™ headset.

However, we’ve never introduced an innovation just because we could. They’ve always started with you, our customer, looking for a better way to work. GN Netcom innovations have always been born of needs in the real world, such as better sound quality, more freedom of movement and greater ease of use.

We insist our products work harder for you, to give you more for your money. Sometimes that means more capabilities. Sometimes, it’s more convenience. More frequently, it means future-readiness—setting you up to succeed with emerging technologies.

Of course, while we look to the future, we never abandon the standards that brought us here. GN Netcom will always stand for the very best in sound quality, comfort, durability, selection and service. Which is why a hands-free headset solution from GN Netcom will always be the very best choice for you and your business.

The GN 2100 Headset

solution

Next-generation professional headsets.

GN 2100 headsets come in a variety of styles, including the GN 2100 SoundTube,[™] the first next-generation voice tube headset.

GN 2100 SoundTube (GN 2110 ST)

The voice tube headset with superior sound.

- Acoustic Transmission Line (ATL) technology eliminates voice tube reverberations.
- Convenient swing-away boom.
- Full-size leatherette ear cushion for all-day comfort.

GN 2117 ST

- On-the-ear version of GN 2110 ST, with the SureFit flexible earhook and foam ear cushion.

GN 2115 ST

- Binaural version of the GN 2110 ST, with an additional leatherette-cushioned speaker to reduce ambient noise.
- Single-wire binaural design.

GN 2100 Flex (GN 2120 NC)

The next-generation answer for noisy environments.

- DuraFlex[™]-II microphone boom for precise mic positioning.
- Noise-canceling microphone filters out background noise.
- Full-size leatherette ear cushion for all-day comfort.

GN 2127 NC

- On-the-ear version of GN 2120 NC, with the SureFit flexible earhook and foam ear cushion.

GN 2125 NC

- Binaural version of the GN 2120 NC. Its second leatherette-cushioned speaker and noise-canceling microphone make it ideal for noisy environments.
- Single-wire binaural design.

2 YEAR "NO FINE PRINT" WARRANTY

GN 2100 headsets are also available in Direct Connect (no amp needed) models.

www.gnnetcom.com

The Profile SureFit Headset

solution

The three-in-one headset.

Only Profile SureFit gives you three interchangeable wearing styles—flexible earhook, earloop (4 sizes) and click-stop headband—all in our lightest headset.

405-SF

The three-style, fixed boom headset.

- Three wearing styles for the ultimate in personal choice.
- Low-profile design.
- Ultra-thin, telescoping, swing-away fixed boom.
- Omnidirectional microphone.

405-FLEX-SF

The have-it-your-way headset.

- Three wearing styles, plus the convenience of a fully-flexible, super-durable boom.
- Adds a noise-canceling microphone to block out distracting background noise.
- Featherweight, low-profile design.

405-UNC-SF

The ultimate in noise-canceling!

- Three-in-one Profile convenience, plus an ultra-noise-canceling microphone, the most effective noise-canceling microphone in the industry.
- Low-profile design.
- Ultra-thin, telescoping, swing-away fixed boom.

2 YEAR "NO FINE PRINT" WARRANTY

The 405-FLEX-SF is also available in a Direct Connect (no amp needed) model.

Headset

solutions

Models of sound design.

If you're looking for advanced design, look no further. ADDvantage Plus set the standard for sound, comfort and durability. The GN 2200 Omega builds in great value. While attention to detail marks the Orator-G.

ADDvantage Plus (ADP-I)

The headset call centers count on.

- BroadBass™ speakers for great sound quality.
- Noise-canceling microphone cuts background noise.
- Virtually indestructible DuraFlex cable and mic boom.
- Stay-Put click-stop headband for a custom fit.
- Pillow-Soft ear cushions for all-day comfort.
- For noisy environments, ask for the ADP-II binaural.

GN 2200 Omega (GN 2220)

High-performance, highly affordable headsets.

- DuraFlex-II microphone boom adds style and strength.
- Noise-canceling microphone reduces background noise.
- Elegant, lightweight design for all-day wearability.
- Comes with both foam and leatherette ear cushions.
- Stay-Put™ click-stop headband for a perfect fit.
- For noisy environments, ask for the GN 2225 binaural.

Orator-G (OG-I)

A whole new level of comfort, stability and performance.

- Swing-away flexible microphone boom for real-world convenience.
- Noise-canceling microphone reduces background noise.
- Quality pivoting speaker and soft foam ear cushions.
- Click-Stop adjustable headband for a perfect fit.
- For noisy environments, ask for the OG-II binaural.

2 YEAR "NO FINE PRINT" WARRANTY

ADDvantage Plus headsets are also available in Direct Connect (no amp needed) models.

Headset

solutions

Versatility and value.

If you need a headset, but want a little something different, take a look at the Contour LX-G, Stratus Ultra-G and 805-Flex—three innovative ways to get GN Netcom-quality sound.

Contour LX-G (LX-G)

Optimum call center comfort and clarity.

- In-the-ear headset, with foam EarTiptlets™ and Latex eartips for all-day comfort.
- Adjustable capsule and patented hinge for a stable, comfortable fit.
- Noise-canceling microphone for crystal clear communication.
- Non-kink flexible microphone boom for long-term reliability.

Stratus Ultra-G (ST-I)

Convertible comfort, convenience, clarity and cost-effectiveness.

- Two wearing styles, headband and ear capsule.
- Patented adjustable Lobe Hinge™ for a custom on-the-ear fit.
- Swivel-mount receiver moves with you.
- Non-kink, flexible microphone boom for durability and reliability.
- Noise-canceling microphone delivers improved call clarity.

805-FLEX

The headband-free binaural headset.

- Two wearing styles, under the chin and behind the neck.
- Flexible mic boom and noise-canceling microphone.
- A choice of eartip styles, foam (on-the-ear) and conical (in-the-ear).
- Single wire binaural.
- Easily converts to a monaural headset.

Plantronics Users

Move up to GN Netcom headsets with the GN Upgrade Cord. It's as easy as 1, 2, 3:

- 1 Unplug Plantronics headset from Plantronics amplifier.
- 2 Plug GN Netcom headset into GN Upgrade Cord.
- 3 Plug GN Upgrade Cord into Plantronics amplifier.

GN Upgrade Cord

You know it's time to move up to GN Netcom. But can you connect GN Netcom headsets to Plantronics amplifiers? Yes you can, with the GN Upgrade Cord!

With the GN Upgrade Cord, you can get the benefits of GN Netcom headsets—and an alternative to spending money on repair—while capitalizing on your amplifier investment. Just plug a new GN Netcom headset into one end, and plug the other end into your Plantronics amplifier. You'll get better sound, comfort and durability than with your Plantronics headset. It's that simple! All of which will cut down on talk time per call, and boost your productivity. (Of course, if you want the very best sound, you'll need a complete GN Netcom system—headset and amplifier.) So make the move, cost-effectively, with the GN Upgrade Cord.

Buy any GN 2100 Series headset by December 31, 2002, and get a GN Upgrade Cord—FREE! (A \$30 value.)

Direct Connect

For phone systems that are equipped for direct connect headsets (without the use of an amplifier), the sound choice is GN Netcom.

These GN Netcom Direct Connect headsets feature our exclusive PureVox microphone technology which amplifies microphone output. They also boast a considerably wider receive bandwidth than competitive models. (2700 Hz compared to the competition's 900 Hz!) Together, that means you get just what you'd expect from a GN Netcom Direct Connect headset—vastly superior sound quality. So you never have the added expense of a separate amplifier, which is often the case with other brands.

If your phone system is designed to let you go direct, go GN Netcom. You'll get better performance, and a better value. Call for more information, or to order.

The GN 9000 Series of Wireless

headset solutions

Go the distance.

The "First Family" of wireless headset solutions, the GN 9000 Series lets you choose the wireless solution that works best for you.

GN 9020 D

Unplug-and-play simplicity.

- All-in-one design for wireless convenience and ease of use.
- Incredibly lightweight—only 2.1 ounces.
- 2.4 GHz transmissions for great sound, up to 50 feet from base station.
- 5 hours of talk time per battery charge.
- Transmissions secured by digital encryption and Spread Spectrum technology.
- Also available in Bluetooth™ version. (GN 9010).

GN Ellipse

You'll go far.

- Interference-free 2.4 GHz transmissions let you roam 200 feet from base station.
- All-day performance (round-the-clock with optional second battery).
- Digital Spread Spectrum technology for state-of-the-art call security.
- Beltpack/headset design lets you choose any GN Netcom headset.
- Handset Lifter option lets you answer calls, and hang up, remotely.

GN 9050

Wireless for less.

- The first wireless headset system for the office that balances performance *and* affordability.
- 2.4 GHz transmissions give you a 150-foot range.
- 6 hours of talk time per 3-hour charge (second battery optional).
- Digital Spread Spectrum technology for secure communications.
- 4-oz remote unit and .75-oz headset for lightweight comfort.
- Handset Lifter option lets you answer calls, and hang up, remotely.

1 YEAR FACTORY WARRANTY

BLUETOOTH is the new global standard for affordable, short-range wireless connectivity. The Bluetooth protocol can connect up to eight devices in a 30-foot range, even around corners and through walls.

Amplifiers

The perfect amp for every purpose.

GN Netcom invented the multipurpose amplifier, but we didn't stop there. Now we offer the best selection of amplifiers—multipurpose and otherwise—anywhere.

GN 8000 MPA™

The first multipurpose, multi-brand amplifier.

- One amplifier for GN Netcom, UNEX and ACS brand headsets.
- Universal telephone compatibility.
- Voice compression for advanced hearing protection.
- Voice switching reduces background noise.
- User-selectable battery save.
- Headset/handset switch, sliding volume control, clickless mute switch and built-in headset stand.
- Optional online indicator.

GN 8050 TCA

The first universal computer/telephone amplifier.

All of the features of the GN 8000 MPA, plus:

- Easily switch between telephone and computer.
- Universal plug-and-play compatibility.
- Works with most phones with a modular connector.
- Plugs into any Sound Blaster-compatible PC.
- Perfect for all computer applications.

SPECIALTY AMPLIFIERS

- The **0686 in-line amplifier**, for standard carbon applications.
- The **0452 two-prong amplifier**, for phones with a two-prong headset port.
- The **0911 amplifier**, for 6-wire push-to-talk environments.
